LITTMANN™ LIGHTWEIGHT II NURSING STETHOSCOPE

Designed to meet the needs of nursing professionals. The Littmann Lightweight II S.E. stethoscope has a unique ovoid double-sided chestpiece for better movement around blood pressure cuffs and body contours, making it ideal for listening to blood pressure, chest, bowel, abdominal, heart, lung and breath sounds. An excellent, affordable choice for blood-pressure and patient assessment.

SPECIFY COLOUR: Black, Ceil Blue, Burgundy

DI421	Littmann™ Lightweight II Nursing	**£24.95**

LITTMANN™ SELECT STETHOSCOPE

The affordable general examination stethoscope with patented single-side chestpiece. Reliable and clear acoustics. Single-sided listening for both low and high frequencies (bell and diaphragm combined). Lightweight, durable design with scratch resistant finish on chestpiece. Nonchill chestpiece for patient comfort. 2 year warranty.

SPECIFY COLOUR: Black, Burgundy, Purple, Royal Blue

DI405	Littmann™ Select	**£36.00**

LITTMANN™ CLASSIC II SE STETHOSCOPE

A standard of the industry. Patented floating diaphragm assures high acoustic sensitivity. The durable, single lumen tubing and solid, stainless steel combination chestpiece signify quality. Soft-sealing eartips offer maximum comfort and an excellent acoustical seal. 71 cm tubing. Three year warranty.

SPECIFY COLOUR: Black, Grey, Burgundy, Navy Blue

DI410	Littmann™ Classic II SE	**£57.50**

DI410
(Burgundy)

LITTMANN™ PAEDIATRIC CLASSIC II STETHOSCOPE

The two-sided chestpiece with traditional bell/diaphragm is designed and sized to provide Littmann™ quality acoustics for children. Features a traditional bell combined with a floating diaphragm. This stethoscope features a solid stainless steel chestpiece for high acoustic sensitivity.

SPECIFY COLOUR: Black, Caribbean Blue, Red

FREESTYLE OPTIMUM BLOOD GLUCOSE MONITORING SYSTEM

FreeStyle Optium, previously known as the Optium Xceed is designed for people who want quick and reliable blood glucose results for easy, everyday testing. FreeStyle Optium test strips are also compatible with the previous Optimum Xceed Glucometer. With technology used by hospitals worldwide, FreeStyle Optium can also test for blood ketones and assist in sick day management.

Everyday simplicity for clear testing

- No coding for easy testing
- Foil wrapped strips to minimise the risk of contamination
- Checks both blood glucose and blood ketones
- Back light for night time testing
- CoPilot compatible – download up to 450 results to print simple reports

DISPOSABLE PENLIGHT

Sealed concentric beam, disposable diagnostic penlight and pupil gauge. Activated by depressing pocket clip.

DI050S	Disposable Penlight (Single)	**£1.45**
DI050	Disposable Penlight (Pack of 6)	**£5.95**

DI059

PINK REUSABLE PENLIGHT

Ideal tool for general diagnostic use and general examination. Each penlight is supplied complete with batteries

DI059	Pink Reusable Penlight	**£2.45**

DI057

METALITE REUSABLE PENLIGHT

Reusable penlight with brushed aluminium housing. Activated by depressing pocket clip. Two AAA batteries included.

DI057	Metalite Reusable Penlight 352	**£2.25**

DI049

SPIRIT CHROME PENLIGHT

An innovative extra bright cool light diagnostic penlight with chrome plated brass casing, pocket clip press activator switch, pupil gauge and slide rule.

- Powered by 2 x AAA batteries (Not Included)
- Includes pentorch with aural adaptor, 3 speculum and compact case

DI049	Spirit Chrome Penlight	**£19.95**

DI390

POCKET OTOSCOPE/OPHTHALMOSCOPE SET

Designed to meet your demanding needs, both instruments feature 2.5v halogen illumination for true tissue colour and consistent, long lasting lamp performance. Each ultra compact instrument is ergonomically designed for comfort as well as German engineered for precision crafted performance and rugged durability. Uses AA batteries.

DI390	Pocket Otoscope/Ophthalmoscope Set	**£149.95**
DI391	Otoscope Specula - 2.75mm (Pack of 850)	**£23.42**

PICCOLIGHT DIAGNOSTIC SET

Contains:

1 Piccolight E50 Ophthalmoscope Head
1 Piccolight C Otoscope Head
1 Battery Handle
10 Disposable Ear Funnels (2.5mm)
10 Disposable Ear Funnels (4.0mm)
1 Fabric Bag

DDU229	Piccolight Diagnostic Set	**£119.95**
DDU320	Disposable Ear Funnels - 2.5mm (Pack of 100)	**£7.95**
DDU321	Disposable Ear Funnels - 4.0mm (Pack of 100)	**£7.95**

DDU229

PICCOLIGHT FIBRE OPTIC OTOSCOPE

An ergonomically designed high quality instrument which emits an intensive white circular light. High grade fibre optics with halogen light source. Features a built in pocket clip and on off switch. Supplied with 20 disposable funnels and nylon pouch. Requires 2 AA Batteries (Not Supplied).

SPECIFY COLOUR: Black Blue

DDU220	Piccolight Otoscope	**£59.95**
DDU320	Disposable Ear Funnels - 2.5mm (Pack of 100)	**£7.95**

ORION XENON STANDARD DIAGNOSTIC SET

Size 'C' 2.5V Xenon standard diagnostic set supplied in hard plastic case. Lifetime guarantee.

Contains:

1 Interchangeable Handle
1 Otoscope Head
1 Opthalmoscope Head
1 Spare Otoscope Bulb

DDU230	Orion Xenon Standard Diagnostic Set	**£94.95**

DDU230

ENT POCKET LIGHT/OTOSCOPE

The ENT Pocket Light/Otoscope is a versatile exam light designed for oral, nasal and ear examinations as well as cerumen management. It utilises state-of-the-art technology to provide superior illumination, durability and ease of use at a fraction of the cost one would expect to pay. Set includes ENT Pocket Light, otoscopic head, 1 reusable adult speculum, 2 lighted cerumen loops, 1 nasal exam head, spare Xenon bulb and instructions. Package size 15 x 5 x 2.5cm.

DI395	ENT Pocket Light/Otoscope	**£44.95**

DDU992

HEINE KAPPA 180 FIBRE OPTIC DIAGNOSTIC SET

Durable polycarbonate diagnostic set, combination otoscope and ophthalmoscope. All handles are fitted with ceramic rheostats that guarantee consistent illumination over long periods.

- Hard ABS plastic construction
- 3x magnification window, air tight
- New Xenon bulb gives incredibly bright light
- K180 Ophthalmoscope head
- K180 Fibre Optic Otoscope head
- Set of 4 autoclavable speculae
- Supplied in protective zip fastening case
- 28 lenses for fine focusing
- Dust protection seals
- Wide range of apertures, including red-free, small and large spot, target and still lamp

DDU992	Heine Kappa 180 Fibre Optic Diagnostic Set	**£340.00**

DI396

PICCOLIGHT E56 DIAGNOSTIC SET

Combining fantastic quality and great value, the Kawe Piccolight® E56 Diagnostic Set provides everything expected from a diagnostic set at a price that's affordable. With a choice of 4 colours and housed in a convenient hard carry case, the Piccolight E56 is ideal for a general practitioner, practice nurse or trainee.

- Supplied in hard carry case
- PICCOLIGHT® Fibre Optic Otoscope with 3x magnification with intensive Xenon lamp
- 20 Disposable ear specula (2.5 mm and 4.0 mm - 10 of each supplied)

DI396	Piccolight E56 Diagnostic Set	**£169.95**

DI399

COMPACSET DIAGNOSTIC TOOL

The Welch Allyn CompacSet provides a high quality otoscope and ophthalmoscope in a single lightweight, hand-held unit which can be kept easily to hand, making it ideal for home visits

- Instruments automatically switch on when lifted out and off when folded back in
- Fibre Optic otoscope has an integral throat illuminator and insufflation port for pneumatic otoscopy
- A soft carrying case with belt clip is included
- Supplied complete with 2 x AA batteries
- Ophthalmoscope has 6 apertures: small, medium and large spot, target, slit and cobalt blue, plus red-free filter
- Ophthalmoscope has sealed, dust-free optics and 48 viewing lenses

DI399	CompacSet Diagnostic Tool	**£304.95**

MASIMO® RAD-5V™ FEATURING SET TECHNOLOGY

Since its introduction, more than 100 independent and objective clinical studies have documented that Masimo® SET is the most accurate and reliable SpO2 technology, improving patient outcomes even in the most difficult clinical conditions making it ideal technology for your challenging environments. The accuracy and reliability of Masimo SET pulse oximetry in a compact device, perfect for spot-check and triage.

Features:

- Masimo SET® technology is scientifically and clinically proven to provide accurate pulse oximetry measurements during motion and low perfusion
- Lightweight, convenient handheld device with a long battery life—over 30 hours on 4 AA batteries
- FastStart™ allows for rapid measurement at start-up
- Perfusion Index (PI) indicates arterial pulse signal strength
- Signal I.Q.® (SIQ) bar for signal identification and quality indication during motion and low signal to noise situations
- Audible and visual alarms for Sensor Off and Low Battery
- Protective boot cover with built in table-top stand included

Signal I.Q.® (SIQ) bar is used for signal identification and quality indication during motion and low signal to noise situations. The LED rises and falls with the pulse, its height indicating signal quality. When Signal I.Q. is very low and the SpO2 and pulse rate values may be suspect, the LED turns red. The Alarm Status Indicator flashes when an alarm condition is present.

Perfusion Index (PI) indicates arterial pulse signal strength. The LED bar is highest and green when the quality of the perfused site is best; when PI is poor the LED bar is low and turns red.

DI9113	Masimo® Rad-5V™ with SET Technology	**£285.00**
DI1396	Masimo® LNOP DCSC Sensor (Adult)	**£150.00**

MD300 FINGER PULSE OXIMETER

The MD300 Pulse Oximeter is a small, lightweight and portable device suitable for use with either adults or children.

- Simple and convenient one button operation
- SpO_2%, PR and Pleth waveforms are displayed on screen
- SpO_2%, Range: 70-99%
- Pulse Range: 30-235bpm
- Option of displaying the Pleth waveform in two formats
- The display can be easily rotated to display in 4 directions
- Clear OLED colour display
- Compact and lightweight (only 50g with batteries!)
- Low power - Continuous operation for up to 20 hours
- Adjustable brightness of background light (10 Levels)
- Low power consumption (2 x AA Batteries included)
- Signal strength indicator

DI535	MD300 Finger Pulse Oximeter	**£59.00**
DI536	MD300 Finger Pulse Oximeter Carry Case	**£4.99**

DI535

VM-2105 PULSE OXIMETER

Incorporating the latest technology; a clear and bright colour OLED display encapsulated in a unique durable, soft silicone housing. The hygienic and easy to clean, soft silicone housing, of the VM-2105 offers superior comfort and fit, allowing for a more accurate and reliable reading, and with no hinge assembly to break this unit is extremely robust and able to withstand even the toughest of environments.

- Unique soft silicone housing for superior comfort and fit
- Robust - no hinge assembly
- 16 bit processing facilitates low perfusion capability
- Clear and bright, colour OLED display
- Display can be viewed in 4 rotations
- Pleth waveform, displayed in 2 formats
- Colour coded signal quality and signal strength indicator
- Adjustable brightness
- Meets ISO 9919:2005 Standards; shock, vibration, drop and water ingress tests

SPECIFY COLOUR: Grey Orange

DI525	Viamed VM-2105 Pulse Oximeter	**£220.00**

DI525

M-PULSE PAEDIATRIC PULSE OXIMETER

Specifically designed for paediatric use with a smaller fingertip dimension than other pulse oximeters, the Merlin Medical M-Pulse Paediatric Finger Pulse Oximter is one of the most compact devices of its type available.

- 6 display modes
- 10 brightness levels

DI529	M-Pulse Paediatric Pulse Oximeter	**£89.95**

DI595

VIAMED
HAND HELD PULSE OXIMETER

Designed with the most difficult conditions in mind, the VM-2160 Hand Held Pulse Oximeter is lightweight and compact with an ergonomic and durable design. Incorporating adjustable high and low alarms for both SpO2 and pulse rate this compact and lightweight oximeter can be used for spot checking as well as continual patient monitoring.

- For spot checking or constant monitoring of SpO2
- Clear and bright, colour OLED display
- Robust, ergonomic design with durable silicone protective cover
- Includes a durable 3rd generation soft silicone sensor
- Stores and restores up to 48 hours of trend data
- Adjustable high and low alarms

Standard accessories included:

1 Reusable Adult Silicone Finger Sensor
1 PC Software
1 USB Data Cable
1 Silicone Protector Cover
3 AA Batteries

VIAMED ETCO$_2$ & SPO$_2$ MONITORS

The ultra-compact, ergonomic design of the VM-2500-M and VM-2500-S combine outstanding performance and reliability in CO_2 and SpO_2 monitoring. Combining innovative technologies and design with the latest materials, to create extremely accurate and reliable measurements for intubated or non-intubated patients. Fast warm-up time of < 10 s to full specification.

Mainstream VM-2500-M

- Mainstream CO_2 measurement with the IRMATM CO_2 Analyser
- 'PLUG-IN and MEASURE…TM' technology – no integration procedures or associated expenses required
- NO occlusion by water or mucus possible
- IRMA™ airway adapter with XTPTM non-condensing light transmission window
- Small, lightweight and shock-resistant; the IRMATM CO_2 Analyser weighs less than 30g
- Direct measurement without time delay

Sidestream VM-2500-S

- Sidestream CO_2 measurement with the ISATM CO_2 Analyser and Nomo technology
- The Nomo Adapter uses Nomo technology which removes water and vapor from the sampled gas
- The Nomo Adapter includes a hydrophobic bacterial filter to protect against water intrusion and cross contamination
- Specifically designed for low flow applications; 50 ml/min sampling flow for all applications, from Adults to Neonates

DI613	Viamed Mainstream ETCO$_2$ VM-2500-M	**£2195.00**
DI614	Viamed Sidestream ETCO$_2$ VM-2500-S	**£2195.00**

SPECTRO2™ HAND HELD PULSE OXIMETER

Affordable, dependable and easy to use. The SPECTRO2™ range of hand held pulse oximeters deliver reliable performance, meeting the needs of health care providers in primary care environments plus it's unique range of accessories allow customisation to meet the needs of virtually any clinical environment.

- Comfortable ergonomic design allows easy one-handed operation
- Large, bright, easy to read LED for at-a-glance assessment
- Stores patient data for transfer to PC for improved efficiency
- Optional printer eliminates possible documentation errors
- Displays SpO_2, pulse rate, signal strength and Pulse amplitude Index (PI)
- Unique on-board cradle to store and protect finger sensor
- Docking station available separately for safe storage
- Nellcor® sensor compatibility
- Low battery indicator
- Multiple Power Options
- Durable, reliable performance you expect from the BCI brand

MASIMO® RAD-57™ FEATURING RAINBOW TECHNOLOGY

Too often, even the most skilled first responders miss the chance to treat carbon monoxide poisoning early because until now there hasn't been a fast, accurate and noninvasive way to detect elevated levels of CO in the blood. With the Masimo Rad-57 you caneasily detect carbon monoxide poisoning on the spot in just seconds with the push of a button, allowing for prompt and possibly life-saving treatment that can also limit the likelihood of long-term cardiac and neurological damage

The Rad-57™ features Rainbow technology which combines the latest in system theory, adaptive signal processing and a revolutionary sensor that employs 7+ wavelengths of light to collect and analyse an extraordinarily rich stream of physiological data. Sophisticated processing of this data permits Rainbow SET's unique ability to accurately measure carbon monoxide (SpCO™), methemoglobin (SpMet™) and potentially other future parameters. This will help eliminate the risk of misdiagnosing unsuspected CO poisoning as flu or fatigue and help detect potentially life-threatening acquired methemoglobinemia. The Rad-57 is quick and easy to use, requires no user calibration, and does not require patient cooperation or consciousness.

Features:

- Perfusion Index and Signal IQ™ displays
- Designed for continuous or spot check applications
- Four AA alkaline batteries deliver over 8 hours of continuous monitoring of SpCO, SpMet, SpO2, Pulse Rate and Perfusion Index
- Perfusion Index (PI) indicates arterial pulse signal strength and may be used as a diagnostic tool during low perfusion
- Low Signal IQ™ (SIQ) indicator highlights conditions of low signal quality
- FastSat™ tracks rapid changes in arterial O2 with unmatched fidelity
- SmartTone™ beeps in sync with pulse, even under patient motion conditions
- Up to 72 hours of trending memory of SpCO, SpMet, SpO2, Pulse Rate and Perfusion Index
- Sensitivity options: APOD, Normal, and MAX
- Protective boot covers and carrying cases available in multiple colours

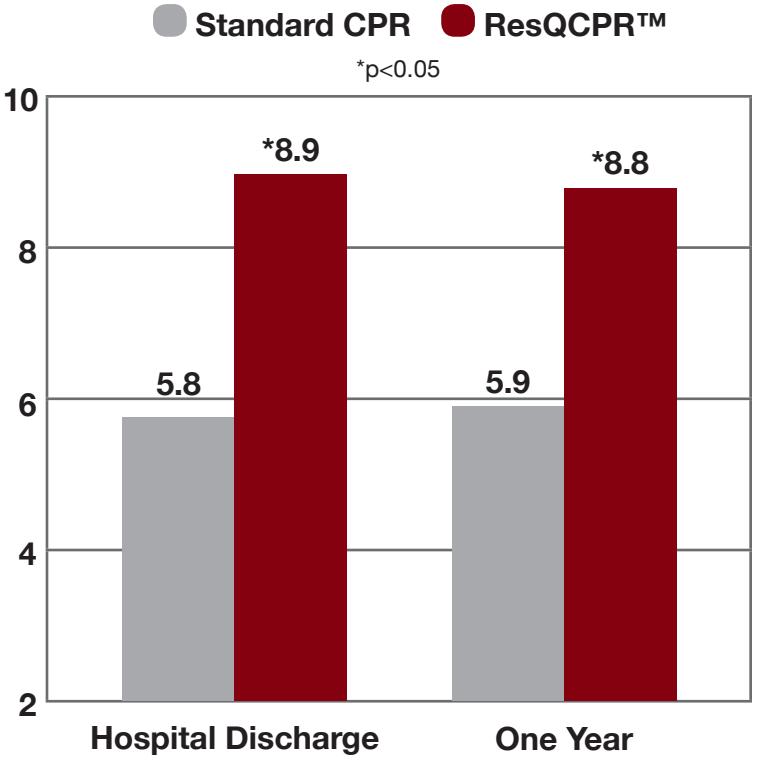
ResQCPR™

Increase survival from sudden cardiac arrest by 53% using the CardioPump® ACD-CPR Device and ResQPOD® ITD together

Long-Term Survival (%) with Favourable Neurologic Outcome



Aufderheide et. al Lancet 2011;377(9762):301-311

Find out more online at MedTree.co.uk/ResQCPR

ResQCPR™ Kit

Haemodynamic benefits are best when an ITD is used in combination with ACD-CPR (ResQCPR™). Studies* have shown that, compared to standard CPR (S-CPR), performing ResQCPR™

- Provides near-normal blood pressure and cerebral blood flow
- Increases coronary perfusion pressure
- Lowers intracranial pressure during the chest recoil phase
- Lowers intrathoracic pressure during the decompression phase of CPR
- Increases long-term survival with favourable neurological outcomes

RE575	ResQCPR™ Kit (Includes 2 x ResQPOD® ITD and 1 x CardioPump® ACD-CPR Device with Metronome)	**£499.00**

CardioPump® ACD-CPR Device

The CardioPump® permits the rescuer to perform active compression decompression CPR (ACD-CPR) and:

- Optimises haemodynamics during CPR by allowing the rescuer to not only compress, but ACTIVELY lift the chest; thus assuring complete chest wall recoil and beginning the creation of negative intrathoracic pressure
- Assists the rescuer in monitoring compression and decompression forces
- Promotes proper compression rate

ResQPOD® ITD

The ResQPOD® is an impedance threshold device (ITD) that:

- Further reduces intrathoracic pressure by limiting the influx of air into the chest during the active chest wall recoil phase. This greater vacuum pulls more blood back to the heart (preload) and results in greater cardiac output on the subsequent compression
- Can be applied early on a facemask and on a variety of airway adjuncts
- Promotes proper ventilation rate

*List available online at www.MedTree.co.uk/ResQCPR

NEW

DI6900

LIFEPAK CR PLUS AED

- Delivers an escalating shock up to 360 Joules
- 9 seconds to first charge
- Bi-Phasic
- Low maintenance cost
- Drop tested from 1 metre on each corner
- Designed for use by people with little/no experience (fully automatic) and for trained medical responders
- Voice instructions guide the user throughout the defibrillation process
- Features a quick reference card on the inside lid (helpful graphic directions)
- Pre-connected QUIK-PAK electrode pads - easy to open and apply
- Performs automatic-self tests each week
- Readiness display tells the user when the defibrillator is ok to use or if it needs attention
- Analyses the patient's heart rhythm when the electrodes are applied
- Delivers a shock by itself
- Child/infant pads available separately
- Defibrillator records patient and event data Includes a replaceable CHARGE-PAK battery charger; provides a trickle charge to the internal battery
- The CHARGE-PAK battery charger and the QUIK-PAK electrodes have the same replace-by date
- ADAPTIV biphasis technology enhances the chance of defibrillation success by escalating the energy shock level
- Impressive 8 year warranty

Giving you power and flexibility, for optimum patient care

DI768

DDU907

LIFEPAK® 1000 DEFIBRILLATOR

- Designed for and tested by emergency professionals
- An advanced and rugged basic life support device, which gives you the power and flexibility for optimum patient care
- Loud voice prompts and lighted buttons to guide you
- Large LCD screen displaying graphics and text for quick reference can be seen from any angle and in bright sunlight
- Pre-connected electrodes that help speed your response when every second counts
- Paediatric therapy can be easily provided using the infant/child reduced energy defibrillation electrodes
- cprMAX™ technology eliminates the 'hands off' charge time delay in AED mode through background charge features thus maximising hands on time and enables care providers to change protocols as standards of care evolve
- With the manual override option you can decide when to analyse and shock with the touch of a button
- Built-in flexibility allows the LIFEPAK® 1000 to be programmed for use by first responders or professionals
- High capacity battery to provide the power for up to 440 shocks or approx 17 hours of monitoring time
- ECG monitoring via electrodes
- Supplied complete with LIKEPAK® 1000 Defibrillator, Ambu® Res-Cue Mask® first responder kit, non-rechargeable battery, one pair of adult Edge System™ electrodes with QUICK-COMBO™ connector and REDI-PAK™ pre-connect, soft carry case, user guide and quick reference guide

ZOLL® AUTOMATED EXTERNAL DEFIBRILLATOR

- Supports the entire chain of survival with easy-to-understand audio prompts and visual icons
- Graphical, text and audible prompts
- Real CPR Help® with instant feedback on the rate and depth of chest compressions during CPR
- Uses off-the-shelf lithium camera batteries (Duracell 123a)
- Can defibrillate children up to eight years of age, using pedi•padz II™ electrodes
- Easy-to-place, preconnected, one-piece electrode CPR-D•padz™ ensure correct position is maintained
- Lid of the AED Plus is designed to act as a passive airway support
- Rugged design that resists dust and water (IP55 rating)
- Automatic self-testing assures constant state of readiness
- Supplied complete with carry bag, batteries, adult CPR-D•padz™ electrode and product training DVD
- 5 year warranty

LAERDAL® HEARTSTART FRX DEFIBRILLATOR

The Heartstart FRx is an easy to use, rugged and reliable AED for those who get there first. It incorporates a number of features to make sure it is ready when needed with a minimum of maintenance required.

Rugged -The Heartstart FRx is designed to work where rescuers may have to go to. In the rain, on metal surfaces or in industrial areas. The FRx withstands jetting water, loads up to 250kg and 1 metre drops to a concrete floor.

Ready - Internal self testing is key to readiness in infrequently used products. Heartstart FRx incorporates daily, weekly and monthly self testing including a pads connection and integrity test to make sure everything functions when needed.

Virtually maintenance free: Heartstart FRx requires no regular or contractual technical maintenance programs. All vital functions are tested in the internal self test program including full energy charge/discharge. A brief visual inspection confirms whether the FRx is functional or not. The blinking green status indicator is the "ready" signal confirming all is well. Otherwise the FRx will produce an audio signal to notify that inspection is required With the FRx in standby mode maintenance is simply visual inspection and replacement of consumables such as pads (every two years) and battery (every 4 years)

SMART BIPHASIC

LAERDAL® HEARTSTART HS1 DEFIBRILLATOR

Gives you the confidence in knowing that you can save a life even before help arrives. Designed for use by everyone, at any time, at any location. The HeartStart HS1 is...

Easy to use
Calming natural voice instructions coach the first aider through the steps of first aid defibrillation and CPR.

Always ready
Comprehensive automatic self-tests check all the HeartStart's vital functions on a daily, weekly and monthly schedule, including a battery test and a pads integrity test so as to ensure that HeartStart is always ready for emergency life saving.

SMART Biphasic
Low energy 150-Joule shock; the only defibrillation waveform to have international guidelines endorsement. SMART Pads are able to sense whether they have been removed from the cartridge and placed onto the patients chest.

Fast to learn
Extensive research, innovative technologies and years of interface studies have resulted in a defibrillator so simple to operate that a first aider with minimal training can potentially save the life of a co-worker, friend or member of the family or public.

Safe and Effective - SMART Analysis
So accurate that HeartStart was the first automated external defibrillator approved for use on children as well as adults.

Voice coaching
Helps the user take control with easy-to-follow instructions with a clear and confident voice.

Making lifesaving faster, easier, better

Laerdal
helping save lives

LAERDAL® HEARTSTART FR3 DEFIBRILLATOR

The new HeartStart FR3 is one of the best professional-grade AED yet and is now making lifesaving faster, easier and better for professional responders. As the smallest and lightest professional-grade AED available among leading global manufacturers, the HeartStart FR3 is providing an AED that is designed to be rugged, reliable, and support you every step of the way.

FASTER

- Automatically powers on by opening the FR3 carry case so you can focus on pad placement from the start.
- Pre-connected peel and place SMART Pads III with no foil pouch to reduce deployment time.
- Quick Shock reduces CPR interruptions and speeds shock delivery.
- Infant/Child Key automatically decrease the defibrillation therapy and implement the configured infant/child CPR protocols.

EASIER

- Smallest and lightest (1.6kg) professional-grade AED among leading global manufacturers makes the FR3 easier to carry along with other equipment.
- Daily, weekly, and monthly automated self-tests, including pads integrity, help make it easier to ensure the FR3 will be ready when needed.
- Bilingual configuration makes it easier to use the FR3 in bilingual work environments.
- Long-life battery typically delivers 300 shocks or, if configured, 12 hours of monitoring to give you confidence that the FR3 will be ready when needed.
- CPR Metronome keeps the beat for consistent chest compressions

BETTER

- Review, annotate, print, and store AED events with HeartStart Event Review for timely retrospective responder feedback for more effective training.

mindray

The carry case is durable and the central window allows the AED display to be easily viewed

MINDRAY BENEHEART D1 DEFIBRILLATOR

The BeneHeart D1 is a lightweight, compact, durable and powerful automated external defibrillator (AED). Based on biphasic technology, the delivered energy can be escalated up to 200 shocks at 360J. The device also allows you to improve the defibrillation success ratio by increasing the dose of subsequent shocks. The BeneHeart D1 is available as two configurations; there is a professional grade D1 designed especially for BLS and ALS team, and there is also a public D1 configuration that is designed to be reliable, simple and easy to use by any rescuers. Both configurations have the following features as well as unique features listed below:

- Large 7-inch TFT display supporting clear visual guide with colour animation
- Pre-connected pads that save time
- Easily switch between paediatric and adult patients with the press of one button including the ability to auto-identify patient type
- Auto-adjustable volume and screen brightness allow you to comfortably use D1 in a variety of environments
- Li-ion battery supporting more than 300 shocks at 200J or 200 shocks at 360J as well as 12 hours of monitoring. The external charger keeps a spare battery charged and ready for use. The Li-ion battery is compatible with BeneHeart D3's.
- Automated self-tests are performed periodically and results are shown through audiovisual alerts.

BeneHeart D1 Pro: This configuration of the D1 with its intelligent functions and intuitive user interface make it an efficient and flexible lifesaving aid for the professional responder. The D1 Pro has the following unique features:

- Real manual mode with energy level selection provides the complete 1-2-3 step process for you to deliver high-quality shocks to the patient
- Independent 3-lead ECG monitoring through a separate socket allows you to view more ECG leads or arrhythmias while the pads are still being used
- Synchronised cardioversion is also available
- The carrying case offers space for D1 together with a spare battery, ECG wires and cable as well as a small kit containing scissors and a razor
- You can export data from the D1 through a USB drive and review it on a computer / laptop using Mindray software

BeneHeart D1 Public: Sudden Cardiac Arrest (SCA) can happen to anyone at anytime and anywhere. The Mindray BeneHeart D1 defibrillator helps to respond to SCA in a variety of locations, such as schools, the workplace, and the sporting arena. The public D1 is designed to be reliable, simple and easy to use with the following unique features:

- Easy 1-2-3 steps of; turning on the device and activating the voice and visual instructions, placing the pads on the patient as guided, and if a shock is advised by the device, press the orange button.
- AED Alert™ System is included with the D1 Public. It is a patented central management solution allowing you to save service and maintenance costs for D1 units installed in public areas. The AED Alert™ monitors the status of each AED to ensure it is in standby mode and will function correctly when needed. Data from the device is transmitted via Wi-Fi to the AED Alert ™ server so it can be viewed and managed by the service team.

CARDIAC SCIENCE POWERHEART G5 DEFIBRILLATOR

The Powerheart G5 is the first AED to combine real-time CPR feedback, fully automatic shock delivery, variable escalating energy, and fast shock times. The powerful capabilities of the Powerheart G5 AED enable rescue professionals and lay responders to administer therapy in a timely and effective manner to give a victim of sudden cardiac arrest the best chance of survival.

DI740

Rugged and reliable, so it's always on duty

- Rugged, durable design for protection against rough treatment
- High ingress protection (IP55) against dust and water for performance in harsh and challenging environments
- Meets rigorous military standards for shock, vibration and drop testing
- Rescue Ready® technology self-checks all main AED components (battery, hardware, software, and pads) daily The AED completes a partial charge of the high-voltage electronics weekly, and a full charge monthly
- The highly visible Rescue Ready indicator assures responders that they are retrieving a working AED
- 7-year AED warranty
- Medical-grade battery with a 4-year full operational guarantee

Easy-to-use AED for responders at all levels

- CPRD Powerheart G5 options provide the user with a CPR device which monitors chest compressions and provides feedback to ensure conformity with Resuscitation Council (UK) Guidelines
- Fully automatic shock delivery eliminates user hesitation (Semi-automatic AED version also available)
- Intuitive, interchangeable pad design simplifies placement
- RescueCoach™ user-paced prompts guide users through each critical step of a rescue
- Text prompts provide extra help in noisy and chaotic enviroments

Advanced patient care

- Delivers post-CPR shock in as little as 10 seconds for effective therapy
- Assesses the patient's therapy needs and delivers customised shock at an appropriate energy level
- Customisable prompts, protocols and CPR feedback to meet user's needs and preferences
- Automatically detects paediatric pads and delivers a reduced energy shock
- Easily update settings if Resuscitation Guidelines change
- Quickly transfer and review data via USB

UNIVERSAL AED PRACTI-TRAINER

Introducing the AED Practi-Trainer Universal AED Trainer. It has all the features and functions the AED instructor wants and needs to teach students in the operation of an AED, with a price that won't break your budget!

DI790

This value-priced trainer features 8 pre-programmed scenarios. All scenarios can be taught in either English or Spanish. The full-function remote control allows the instructor to easily control the rescue scenarios and pause the session when review or discussion is necessary.

The trainer is powered by 3 AA batteries (not included), or can be plugged in using the included AC adapter. If the resuscitation AED guidelines change, or if you need additional languages, the Practi-Trainer has a changeable plug-in module that allows for language changes or future guidelines updates.

Contents:

- Universal AED Practi-Trainer
- Remote Control
- Adaptor
- Set of Adult Pads with Connector
- Set of Child Pads with Connector
- Manual
- Carry Case

LAERDAL® AED TRAINER 3

The AED Trainer 3 reflects the unique functionality of the Laerdal Heartstart FR3 AED, and provides a realistic training experience for emergency responders to deliver optimal therapy when facing cardiac arrest.

DI899

The AED Trainer 3 is configured with eight real-world scenarios that have been developed in accordance with internationally recognised responder programmes. They are AHA and ERC 2010 Guideline compliant. Many parameters on each scenario can be easily configured to conform to local protocols or future Guideline updates. Language voice prompts can also be changed at a touch of a button.

The instructor can change scenarios by pressing the buttons on the device itself or by using an optional remote control. During each scenario, the remote control lets the instructor pause, change or introduce new challenges, to test how students respond to a variety of situations, enhancing the learning experience.

SCHILLER FRED EASYPORT

The SHILLER FRED EasyPort Pocket Defibrillator is a Swiss precision masterpiece. This external defibrillator is so small and light that it fits in every coat pocket and every Doctor's bag, and still meets all requirements of a modern AED.

The FRED Easyport AED from Schiller because of its small size and light weight is intended for use by basic life support responders, healthcare professionals, such as Doctors, Paramedics and public service staff. At risk heart patients could carry this device for their own rescue after they and their family are trained in its use. This would dramatically reduce the response time for treating VF (Ventricular Fibrillation) and giving the patient a better chance of survival.

- It's that small you can carry it in your pocket, on your belt or in your
- First Responder bag
- At only 133 x 126 x 35mm it is not only small but extremely lightweight weighing only 490g
- Simple 3 button operation
- High-resolution screen displays prompts and ECG
- Calm English voice prompts
- Lithium battery, 45 shocks, standby mode 5 years
- Automatic switch to lower Joules when child pads applied

DDU899	SCHILLER FRED Easyport Pocket Defibrillator	**£1,620.00**
DDU890	SCHILLER FRED EasyPort Pads (Adult)	**£30.00**
DDU891	SCHILLER FRED EasyPort Pads (Child)	**£44.00**

SCHILLER ARGUS PRO LIFECARE

Enjoy the power of lightweight patient monitoring in emergency care. One of the most powerful intensive care patient monitors goes mobile - with defibrillator and transcutaneous pacemaker! Whatever the requirement - emergency care, inter-hospital or in-house patient transfer. The ARGUS PRO LifeCare assists you without compromise, all this power in a unique, compact 2.1 kg package. The bright, clear 4.8" screen can display 3 waveforms with 7 parameter measurements providing a complete patient overview. All acquired data, including voice recording, is stored by the ARGUS PRO LifeCare for later external review or case analysis.

Features:

- Full diagnostic ECG (I, II, III, aVR, aVL, aVF, V1-V6)
- NIBP
- SpO2 with plethysmogram
- etCO2 with capnogram
- 2 temperatures
- 2 invasive blood pressures
- Defibrillator with AED and MANUAL mode
- Transcutaneous pacemaker
- Extremely gentle defibrillation energy using Multipulse Biowave® (biphasic pulsed defibrillation impulse, patented)

Options:

- Advanced model features 2 x IBP parameter, 2 x Temperature parameter and 1 x Temperature probe oesophageal or rectal application
- etCO2 mainstream sensor including CO2 sensor and LP interface cable IRMA sensor

Mindray BeneHeart™ D3

Defibrillator/Monitor

mindray
healthcare within reach

from
£3249.95

The BeneHeart™ D3 is a compact, lightweight defibrillator/monitor that integrates a manual defibrillator, AED and pacing with comprehensive patient monitoring functionality. Quick charging and energy delivery at customised energy levels aids effective resuscitation. BeneHeart™ D3 offers responders vital signs monitoring including ECG, respiration and optional SpO_2 to enable continuous assessment of the patient and with IP44 levels of dust and water resistance, the D3 offers reliable performance in a variety of adverse conditions.

Monitoring
High resolution, 3 trace TFT display presents vital signs and other important patient information.

120 Secong Review
Freeze the last 120 seconds of ECG waveforms to enable clinicians to review the ECG and identify arrhythmias.

High Contrast Display
The high contrast display function ensures that critical information can be seen under high illumination e.g. sunlight.

Easy User Configuration
Clinicians can configure the BeneHeart™ D3 to suit their needs via one, easy to use page.

Data Storage
Powerful data storage for up to 100 patient profiles including 1,000 events per patient and 24 hours of ECG; clinicians have access to information for case analysis, statistics and research.

Data Management Software
Data management software offers the capability to review patient data, ECG waveforms and events on a PC. Data can be edited and printed as required.

View the BeneHeart™ D3 and the full range of accessories online at
MedTree.co.uk/BeneHeart-D3

Monitoring
Diagnostic quality, 3/5 ECG monitoring with respiration and optional SpO_2 from Masimo, Nellcor or Mindray.

Manual Defibrillation
Asynchronised defibrillation mode for cardioversion of ventricular fibrillation; Synchronised defibrillation mode for cardioversion of atrial fibrillation. Selectable Metronome aids CPR.

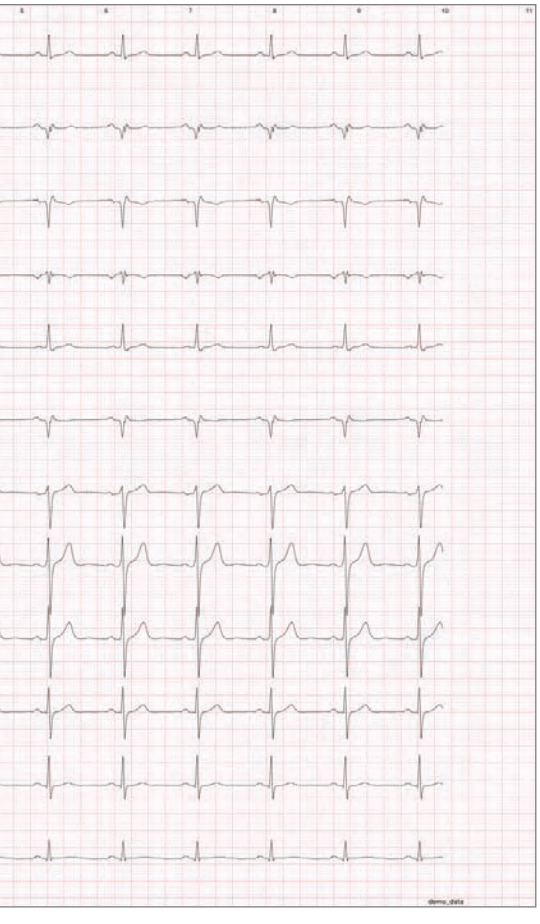
AED
In AED mode, the D3 automatically analyses the rhythm and determines whether a shock is advised. Voice and text prompts guide the user through the process. 180 minutes voice recording is also available for after case analysis and review.

Non-Invasive Pacing
The D3 offers demand mode and fixed mode external pacing with adjustable rates and output. The 4:1 key enables clinicians to quickly select 1/4 of the defined pacer rate for observation of the patient's underlying rhythm.

All prices exclude V.A.T. and carriage.
Standard Terms and Conditions apply.

The ideal solution for portable cardiology diagnosis

ECG reports can be emailed or printed wirelessly as PDF or JPG format



iCV200
CARDIOVIEW RESTING ECG

Introducing the iCV200 Cardioview Resting ECG System, the ideal solution for portable cardiology diagnostics. The iCV200, in conjunction with the vhECG Pro App (activation code supplied), displays, analyses and archives ECG recordings. Simultaneous 12-lead ECG, measurements and interpretation are viewed quickly and easily on your iOS device (compatible with iOS7 and later) giving professionals a brand new approach to monitoring and recording ECG data. Simply connect your iCV200 to your iPad or iPhone using WiFi or Bluetooth, open your vhECG Pro App and you have a comfortable and easy to use ECG device. Combined with the capability of emailing your ECG report as a PDF (or printing via a wireless printer), the iCV200 offers the complete package for portable ECG monitoring. iPad or iPhone not included.

Features:

- 12-channel resting ECG
- Automatic ECG measurements and interpretation
- Data management system
- Records 3, 6, or 12 channels simultaneously in real time
- Reports quickly and easily emailed or printed
- Different contents configurations available, visit on our website for more details

Contents:

1	iCV200 Resting ECG Device

LIFEPAK® 15

MONITOR/DEFIBRILLATOR

PHYSIO CONTROL

LIFEPAK® 15 and the full range of accessories now available

Physio-Control defibrillators have set the standard for over 55 years, and the enhanced LIFEPAK® 15 monitor/defibrillator raises the bar. As their most advanced emergency response monitor/defibrillator, the LIFEPAK® 15 device balances sophisticated clinical technologies and supreme ease of use in a device that's tough enough to stand up to your most challenging environments. Evolving from it's original platform, the LIFEPAK® 15 adds new features - temperature monitoring and external power - to complement existing features which include 360J energy and 12-lead ECG transmission. And that means your team can be even more effective.

The pioneer in portable defibrillation and monitoring technology, Physio-Control is committed to creating technologies and devices that change the way you provide emergency care. You can see the results in the enhanced LIFEPAK® monitor/defibrillator, which sets a new standard in innovation - yet again.

Mindray BeneHeart™ D6

Defibrillator/Monitor

4-in-1 Design:
Manual Defibrillator, AED, Pacer and Patient Monitor

Comprehensive Monitoring Options:
12-lead ECG, SpO_2, NIBP, IBP, temperature and $EtCO_2$

Rapid Charging:
Less than 5 seconds to 200J

Clear Visibility:
Four trace, 8.4" TFT display

Rugged:
IP44 rating and impact tested to 0.75m

from £5499.95

Early intervention in the event of cardiac arrest is critical to a successful outcome. The BeneHeart™ D6 defibrillator/monitor is a full-featured system offering; Manual Defibrillator, AED, Patient Monitor and Pacer - all in one compact device. The BeneHeart™ D6 defibrillator/monitor is easy-to-use and ready-to-go; responders just need to follow a simple 1-2-3 procedure.

BeneHeart™ D6 offers comprehensive monitoring options designed to give clinicians the information they need at this critical time. In addition to ECG, respiration and arrhythmia analysis clinicians can choose 12-lead ECG with full reports, Masimo, Nellcor or Mindray SpO_2, dual temperatures, NIBP, 2 x IBP and CO_2. GSM transmission of 12 lead reports is available to deliver critical data to the hospital enabling early diagnosis and intervention.

- 4-in-1 design: Manual Defibrillator, AED, Pacer and Patient Monitor
- Compact design, easy to carry and easy to operate
- Four trace, 8.4" TFT display offers clear visibility of ECG, vital signs and all patient data
- Defibrillation, synchronised cardioversion and AED with Biphasic technology
- Rapid charging capability - less than 5 seconds to 200J
- Rugged design with IP44 rating and impact tested to 0.75m. Ideal for use in hospitals and by emergency services
- Range of energy selection to maximise defibrillation success
- Comprehensive patient monitoring, offering diagnostic quality 3/5 lead ECG and respiration with optional 12-lead ECG, choice of SpO_2, NIBP, IBP, temperature and $EtCO_2$

PHYSIO CONTROL® DEFIB PADS

DDU907

EDGE System™ Defib Pads with REDI-PAK Pre-Conncet

With the EDGE System™ defib pads with REDI-PAK pre-connect system, customers receive the best technology available. Disposable, combination therapy electrodes perform ECG monitoring and simplify therapy delivery for pacing, defibrillation and synchronised cardioversion. REDI-PAK preconnect system allows electrode connection prior to use without breaking the package seal. Saves valuable time at patient arrival. Eliminates time-consuming electrode changes and promotes continuity of patient care.

Compatible with: LIFEPAK® 12, LIFEPAK® 15, LIFEPAK® 20 LIFEPAK® 500, LIFEPAK® 1000

DDU90	EDGE System™ Defib Pads with REDI-PAK	**£19.00**

PHYSIO CONTROL

DI955 AD

EDGE System™ Defib Pads

Standardisation with the EDGE System™ Quick-Combo pacing / defib / ECG electrodes promotes continuity of patient care by using one fast, easy electrode system and eliminating electrode changes between phases of patient treatment. RTS defib pads (radiotransparent) also available in adult.

Compatible with: LIFEPAK® 12, LIFEPAK® 15, LIFEPAK® 20

DI955 AD	EDGE System™ Defib Pads (Adult)	**£19.00**
DI957	EDGE System™ RTS Defib Pads (Adult)	**£26.00**
DI955 PD	EDGE System™ Defib Pads (Paediatric)	**£26.00**

OTHER DEFIB PADS

DI961 AD

Kimberley Clark R2 Defib Pads

Direct connect multifunction electrodes compatible with all major defibrillator / pacer manufacturers, unique hydrating aqueous gel provides a low impedance electrode. Optional radiolucent electrode available. 36in lead wire.

SPECIFY SIZE: Adult / Paediatric

DI961	Physio Control® "Quick Combo" Compatible	**£16.95**
DI962	Zoll Type Compatible	**£16.95**

DI971

BLUE SENSOR DEFIBRILLATOR ELECTRODES

Blue Sensor's unique offset concept helps maintain a stable, uninterrupted signal even if the lead wire is pulled, thus eliminating movement artefacts. Moreover, the offset connector reduces uncomfortable direct pressure on the patient when attaching cables and prevents gel from being squeezed out onto the adhesive surface. The adhesive itself is both skin-friendly and ultra high tack, so electrodes remain in place even when the patients are sweating. Sensors are silver/silver chloride and the special wet gel provides rapid reduction of skin impedance, which helps avoid baseline drift to ensure a correct ECG the very first time. Adult foam back.

DI976	Blue Sensor 'R' Electrode - Medium (Pack of 4)	**£1.39**
DI972	Blue Sensor 'R' Electrode - Medium (Pack of 10)	**£2.99**
DI975	Blue Sensor 'R' Electrode - Medium (Pack of 50)	**£13.95**
DI971	Blue Sensor 'R' Electrode - Adult (Pack of 3)	**£1.25**
DI974	Blue Sensor 'R' Electrode - Adult (Pack of 4)	**£1.42**
DI978	Blue Sensor 'R' Electrode - Adult (Pack of 5)	**£1.69**
DI973	Blue Sensor 'R' Electrode - Adult (Pack of 10)	**£3.35**
DI977	Blue Sensor 'R' Electrode - Adult (Pack of 25)	**£7.95**

DI9791

AMBU® 274 ELECTRODES

The Ambu® 274 Series White Sensor electrodes feature an aggressive, non-sensitising, acrylic copolymer coated foam. The foam coating has been increased and maximizes adhesion under diaphoretic and stress conditions. It is designed for the difficult adhesion conditions that occur in the diaphoretic patient or anywhere where excessive moisture may be a problem.

DI9791	Ambu® 274 Electrodes (Pack of 3)	**£0.60**
DI9795	Ambu® 274 Electrodes (Pack of 4)	**£0.75**
DI9793	Ambu® 274 Electrodes (Pack of 5)	**£0.87**
DI9792	Ambu® 274 Electrodes (Pack of 10)	**£1.55**
DI9794	Ambu® 274 Electrodes (Pack of 50)	**£7.14**

DI983

3M® RED DOT™ MONITORING ELECTRODES

Multi-purpose monitoring electrodes with foam backing and sticky gel and are ideally suited for the OR, ER, and diagnostic stress testing applications.

- Excellent skin contact
- Sticky gel delivers excellent trace quality
- Instant adhesion
- Up to five-day wear

DI983	3M® Red Dot™ Monitoring Electrodes (Pack of 1000)	**£279.00**

DI984

INSTATRACE™ ECG ELECTRODES

The Conmed adult diaphoretic foam electrodes feature excellent adhesion, hard plastic mounting tray and silver/silver chloride gel.

DI984	Instatrace™ ECG Electrodes (Pack of 30)	**£12.45**

DI985

MEDI-TRACE® ELECTRODES

Reliable electrodes for 12-Lead monitoring. Just peel and place

DI985	Medi-Trace® Electrodes (Pack of 10)	**£1.45**
DI986	Medi-Trace® Electrodes (Pack of 30)	**£6.99**

IV170

MINI PREP RAZOR

The problem with most prep razors is that they're as big as a normal razor. We found one that's flat and it has a miniature comb that lifts the hair so you cut it, not the skin. Supplied in a paper sheath.

IV170	Mini Preparation Razor (Single)	**£0.35**
IV170/50	Mini Preparation Razor (Box of 50)	**£16.50**
IV170/250	Mini Preparation Razor (Box of 250)	**£77.50**

AED PREPARATION RESCUE KIT

All of the essential items to prepare for defibrillation including CPR pocket mask, prep razors and a super absorbent towel. Supplied in a compact black pouch.

Contents:
- 1 Mini Prep Razor
- 1 Curaplex Pocket Mask
- 1 Mini Trauma Shears
- 1 Super Absorbent Towel
- 1 Medium Powder-Free Nitrile Gloves (Pair)

ZZU120	AED Preparation Rescue Kit	**£18.95**

ZZU120

AED SUPPORT KIT

Contents:
- 1 Prep Razor
- 1 CPR Shield
- 1 Clinical Waste Bag
- 2 Hand Towels
- 1 Bandage Scissors
- 2 Antiseptic Wipes
- 1 Large Powder-Free Nitrile Gloves (Pair)

DI933	AED Support Kit (in Yellow Pouch)	**£14.95**
DI934	AED Support Kit (in Poly Bag)	**£9.95**

DI933

WALL MOUNTED AED CABINET

The safest way to display and store AED's in public places. Steel construction with clear panel to allow visual daily inspection of the AED. Compatible with all brands of AED's. Surface wall mounted for easy installation.

Dimensions: 44.5 x 44.5 x 17.8 cm

DI930	Surface Mount (with Alarm)	**£174.95**
DI931	Surface Mount (with Alarm and Strobe)	**£224.95**
